Fintech. Unfiltered.

The largest exclusive FinTech conference for the Indian space is coming to Bengaluru on 7th December 2018.

This year saw a quiet but significant milestone for India - the value of digital transactions crossed Rs. 149.59 trillion in March. From the introduction of new payment systems to regulatory changes, the FinTech segment has undergone major shifts in the last few years. These changes have altered the very nature of consumer behaviour.

How are policies decided and rolled out? Can a good checkout experience improve my conversion rate? How will the latest regulation affect my customer? Should I partner with banks/wallets in order to monetize effectively?

As our world evolves and these questions grow larger, it becomes even more important to be in the know. A platform that helps you communicate and learn from your peers and industry experts, and grow your brand is the need of the hour.

Welcome to Razorpay FTX - a day of honest and open conversations around the what, why, and how of FinTech. We look forward to seeing you there, and learning from you!
